## Why Commodity ?

Commodity can be engaged as a fee based consulting partner or as a supplier of specific products and services - use us to drive cost reductions across the infrastructure, generate better alternatives and realise additional supplier value without incurring additional cost

*"Commodity supports infrastructure decision by providing better choices. We provide the right experience and a market-proof costs model"*

## Quick Wins

Third party hardware maintenance available now for System z9

We can help you to drive the right commercial deal with specialised procurement support during your next vendor negotiation

Tanium Systems Management

Remarketed IBM enterprise server, storage, tape

Commodity supports a wide range of business, operational and technical support services - we can deliver anything from a single man day to a technical project, operational team or resourcing programme

If your organisation is using either contract resources or consultancy services we can provide a well structured and quality service at reduced cost - we compete effectively with both agencies and larger service organisations offering the advantages of both
